

Solar Road Stud AOL20

Specifications:

- 1) Aluminum-alloy shell, transparent plastic shell
- 2) Solar panel 0.4W
- 3) One rechargeable battery (1.2V/1,300Ma)
- 4) PCB with over-charging protection
- 5) Six Super bright LEDs
- 6) Light intensity and view distance: 8,000 to 10,000mcd and over 300m
- 7) Frequency or flash rate: 2Hz or according to customers requirements
- 8) Working model: Steady lighting or Flashing. Depends on your requirements
- 9) Bearable weight: 9 Tons

Color:

AMBER COLOR, RED, BLUE, GREEN, WHITE

Working condition:

- 1) 50 to 60 hours successively after the battery is fully charged
- 2) Charging time: five to six hours/day
- 3) Working temp: --40 degree ---- + 85 degree
- 4) Life time: three to five years

Feature:

- 1) Easy installation, no maintenance
- 2) Saves power, no additional expenses, environmentally friendly, no pollution
- 3) Solar energy-based power source
- 4) Brightness sensitive auto-switch, automatically turns on at night and turns off at dawn

Packaging:

Unit Size: 11X10X2.5CM

Unit Weight: 0.37KG

Packing: 40PCS/CTN, 43X24X16CM

20'FCL: 12,920PCS

40'FCL: 28,500PCS
